

PRAKTIKUM PERTEMUAN 2

Program Pertama di Kotlin

1. KODE 1

```
fun main() {  
    println("Hello, world!")  
}
```

Output : Hello ,world!

2. KODE 2

```
fun main() {  
    println("Hello, Android!")  
}
```

Output : Hello, Android!

3. KODE 3

```
fun main() {  
    println("Hello, Android!")  
    println("Hello, Android!")  
}
```

Output : Hello, Android!
Hello, Android!

4. KODE 4

```
fun main() {  
    println("Today is sunny!")  
}
```

Output : Today is sunny!

5. KODE 5.1

```
fun main() {  
    println("1")  
    println("2")  
    println("3")  
}
```

6. KODE 5.2

```
fun main() {  
    println("I'm")  
}
```

```
println("Learning")
println("Kotlin")
}
```

7. KODE 5.3

```
fun main() {
    println("Monday")
    println("Tuesday")
    println("Wednesday")
    println("Thursday")
    println("Friday")
}
```

7. KODE 5.4

```
fun main() {
    println("Tomorrow is rainy")
}
```

8. KODE 5.5

```
fun main() {
    println("There is a chance of snow")
}
```

9. KODE 5.6

```
fun main() {
    println("Cloudy")
    println("Partly Cloudy")
    println("Windy")
}
```

10. KODE 5.7

```
fun main() {
    println("How's the weather today?")
}
```
